

# AC500

With the AC500 PLC range we provide a reliable and powerful platform to design and create scalable, cost-effective and flexible automation solutions.

## **Scalable**

- The scalability of the AC500 PLCs is achieved by offering a large variety of devices to design and implement configurations suitable for simple control tasks or complex automation solutions.
- The AC500 PLC provides action flexibility with one integrated software.

## **Cost-effective**

- The AC500 PLC range consists of various CPUs, I/O modules, communication modules, communication interface modules and accessories.
- The “all modules used on any CPUs concept” in combination with our life cycle policy helps our customers to react quickly, flexibly and economically on new requirements.

## **Flexible**

- Our AC500 is designed to offer the needed easiness, security and reliability to expand the automation system to new challenges.
- The memory, performance and the networking capabilities mean more functionality, advanced visualization, more operating comfort – for even better individual customer solutions.
